20 numbers are drawn in each draw. You bet if most of the KINO lottery numbers are ONLY or EVEN or if it will be a DRAW.

You choose how much money you want to bet per draw

1€	2€	3€	5€	10€	15€	20€	30€	50€	100€
----	----	----	----	-----	-----	-----	-----	-----	------

You can also choose if you want to play in more than one draw

2	3	4	5	6	10	20	50	100	200
---	---	---	---	---	----	----	----	-----	-----

You win 2 times your bet if you have correctly predicted ONLY or EVEN and 4 times your bet if you have correctly predicted a DRAW

Implement the above functionality using the following interface

interface IKino

```
{  
    int moneyBet { get; set; }  
    int numberOfDraws { get; set; }  
    int totalEarnings { get; set; }  
  
    void ShowDrawNumbers();  
    void calcEarning();  
    void runDraw();  
}
```
